MRP Regional Supplement for Training and Outreach Annual Reporting for FY 2015-2016

INTRODUCTION

This Regional Supplement has been prepared to report on regionally implemented activities complying with portions of the Municipal Regional Stormwater Permit (MRP), issued to 76 municipalities and special districts (Permittees) by the San Francisco Bay Regional Water Quality Control Board (Water Board). The Regional Supplement covers training and outreach activities related to the following MRP provisions:

- Provision C.5.e., Control of Mobile Sources,
- Provision C.7.c.ii.(1), Stormwater Point of Contact,
- Provision C.9.e.ii.(1), Point of Purchase Outreach, and
- Provision C.9.e.ii.(3), Outreach to Pest Control Professionals

These regionally implemented activities are conducted under the auspices of the Bay Area Stormwater Management Agencies Association (BASMAA), a 501(c)(3) non-profit organization comprised of the municipal stormwater programs in the San Francisco Bay Area. Most of the 2015-2016 annual reporting requirements of the specific MRP Provisions covered in this Supplement are completely met by BASMAA Regional Project activities, except where otherwise noted herein or by Permittees in their reports. Scopes, budgets and contracting or in-kind project implementation mechanisms for BASMAA Regional Projects follow BASMAA's operational Policies and Procedures as approved by the BASMAA Board of Directors. MRP Permittees, through their program representatives on the Board of Directors and its committees, collaboratively authorize and participate in BASMAA Regional Projects or Regional Tasks. Depending on the Regional Project or Task, either all BASMAA members or Phase I programs that are subject to the MRP share regional costs.

Training

C.5.e. Control of Mobile Sources

This provision requires:

Each Permittee shall implement a program to reduce the discharge of pollutants from mobile businesses.

(1) The program shall include the following:

- (a) Implementation of minimum standards and BMPs for each of the various types of mobile businesses, such as automobile washing, power washing, steam cleaning, and carpet cleaning.*
 - (b) Implementation of an enforcement strategy that specifically addresses the unique characteristics of mobile businesses.*
 - (c) Regularly updating mobile business inventories.*
 - (d) Implementation of an outreach and education strategy to mobile businesses operating within the Permittee's jurisdiction.*
 - (e) Inspection of mobile businesses, as needed.*
- (2) Permittees may cooperate county-wide and/or region-wide with the implementation of their programs for mobile businesses, including sharing of mobile business inventories, BMP requirements, enforcement action information, and education.*

MRP Regional Supplement for Training and Outreach Annual Reporting for FY 2015-2016

BASMAA's long-standing Surface Cleaner Training and Recognition program addresses these aspects of the provision by focusing on the most common type of outdoor cleaning – cleaning of flat surfaces like sidewalks, plazas, parking areas, and buildings. Individual Permittees address the inspection and enforcement aspects of the provision.

Previously, BASMAA, the Regional Water Board, and mobile businesses jointly developed best management practices. The BMPs were packaged and delivered in training materials (e.g., *Pollution from Surface Cleaning* folder), and via workshops and training videos. The folder and the training video have since been translated into Spanish. Cleaners that take the training and a self-quiz are designated by BASMAA as Recognized Surface Cleaners. BASMAA also created and provides marketing materials for use by Recognized Surface Cleaners. Previously, BASMAA converted the delivery mechanism to being online so that mobile businesses would have on-demand access to the materials and the training. BASMAA continues to maintain the [Surface Cleaner Training and Recognition](#) program. Cleaners can use the website to get trained and recognized for the first time or renew their training and recognition, as required annually. Recognized cleaners can also download marketing materials from the website. Potential customers, including Permittees can use the site to verify the recognition status of any cleaner, as can municipal inspectors.

Subsequent to the development and implementation of the existing program, BASMAA and the Permittees scoped and budgeted for a new project to enhance the existing Surface Cleaner Training and Recognition program in the following ways.

1. Expand the existing Surface Cleaner Training and Recognition Program to include two new mobile business categories - vehicle-related cleaning and carpet cleaning;
2. Develop best management practices for the two new categories based on existing BMPs;
3. Review and revise as necessary BMPs for surface cleaning to be in compliance with the State Water Board's new drought-driven Emergency Regulation for Statewide Urban Water Conservation, and
4. Create outreach materials for the new categories and revise outreach for surface cleaning.

The following has been accomplished:

- Website – Completed major update of the site.
- BMPs – Best management practices were developed and are being finalized for vehicle-related cleaning and carpet cleaning based on existing sets from BASMAA member agencies, other public agencies, and the trade association. BMPs for surface cleaning are being reviewed and revised to incorporate the State Water Board's Emergency Regulation for Statewide Urban Water Conservation.
- Outreach – Outreach materials are being developed for vehicle-related cleaning and carpet cleaning.

MRP Regional Supplement for Training and Outreach Annual Reporting for FY 2015-2016

Public Information and Outreach

C.7.c.ii.(1) Stormwater Point of Contact

This provision requires:

Each Permittee shall maintain and publicize one point of contact for information on stormwater issues, watershed characteristics, and stormwater pollution prevention alternatives. This point of contact can be maintained individually or collectively and Permittees may combine this function with the spill and dumping complaint central contact point required in C.5.

BASMAA assists with this provision by using the regional website: BayWise.org to list or link to member programs' lists of points of contact and contact information for the stormwater agencies in the Bay Area (<http://baywise.org/about-us>).

Pesticides Toxicity Control

C.9.e.ii.(1) Point of Purchase Outreach

This provision requires Permittees to:

- *Conduct outreach to consumers at the point of purchase;*
- *Provide targeted information on proper pesticide use and disposal, potential adverse impacts on water quality, and less toxic methods of pest prevention and control; and*
- *Participate in and provide resources for the "Our Water, Our World" program or a functionally equivalent pesticide use reduction outreach program.*

The Annual Reporting provision requires:

Outreach conducted at the county or regional level shall be described in Annual Reports prepared at that respective level; reiteration in individual Permittee reports is discouraged. Reports shall include a brief description of outreach conducted..., including level of effort, messages and target audience. (The effectiveness of outreach efforts shall be evaluated only once in the Permit term, as required in Provision C.9.f. [Ed. C.9.g]).

Below is a report of activities and accomplishments of the *Our Water, Our World* program for FY 2015-2016.

- Completed comprehensive review and major overhaul of program materials resulting in new (see attachments):
 - Logo,
 - Shelf tag,
 - Literature rack header and side panel signage,
 - Product Guides (3 versions – generic, OSH, Home Depot),
 - Product Guide dispenser,
 - Aisle signage,
 - Business cards, and
 - Fact sheets (14 English, 3 Spanish).

MRP Regional Supplement for Training and Outreach Annual Reporting for FY 2015-2016

- Coordinated program implementation with major chains Home Depot, Orchard Supply Hardware (OSH), and Ace Hardware National. Corporate office of OSH (San Jose) and Home Depot (Atlanta) directed support of the program with their stores.
- Twice printed an inventory of the following: fact sheets, shelf tags, and Home Depot-specific pocket guide, from which participating agencies could purchase materials.
- Updated less-toxic Product Lists: 4 versions – generic product-by-pesticide-fertilizer, generic product-by-pest, OSH product-by-pest, and Home Depot product-by-pest
- Maintained [Our Water, Our World website](#).
- Provided [Ask-the-Expert](#) service—which provides 24-hour turnaround on answers to pest management questions.
- Provided and staffed exhibitor booths (see photos attached).
 - Excel Gardens Dealer Show, Las Vegas (August 2015)
 - L&L Dealer Show, Reno (October 2015)
 - NorCal trade show, San Mateo (February 2016)
- Provided on-call assistance (e.g., display set-up, training, IPM materials review) to specific stores (e.g., OSH, Home Depots).
- Provided print and web advertising – [Chinook Coupon Book](#) (see back cover ad attached).
- Maintained Chinook Book mobile application (app) – [OWOW mobile app](#) (see attached screen shots of Mobile Inline Content in the Chinook Book App).

Although effectiveness information need only be provided in the 2019 annual reports (C.9.g), below are some timely quantitative metrics provided by store partners:

- OSH reported sales in the less toxic and organic category were up 3-4% over the previous year.
- Home Depot reported:
 - They increased their shelf space for less toxic products in their main product aisle by 20% over last year.
 - They merchandized most of these products together in one bay in the main pesticide/garden aisle.
 - Scott's Miracle Gro increased the sales of their less toxic pesticide product line Nature's Care in Home Depot by 30-92%.

C.9.e.ii.(3) Outreach to Pest Control Professionals

This provision requires:

The Permittees shall conduct outreach to pest control operators, urging them to

MRP Regional Supplement for Training and Outreach Annual Reporting for FY 2015-2016

promote IPM services to customers and to become IPM-certified by EcoWise Certified or a functionally-equivalent certification program. Permittees are encouraged to work with the Pesticide Applicators Professional Association; the California Association of Pest Control Advisors; DPR; county agricultural commissioners; UC-IPM; BASMAA; EcoWise Certified Program (or functionally equivalent certification program); Bio-integral Resource Center and others to promote IPM to pest control operators.

The annual reporting requirements are the same as for provision C.9.e.ii.(1) above.

In FY 15-16, BASMAA's Public Information/Participation Committee provided a vehicle for MRP Programs to share information on their efforts to outreach to pest control professionals, including presentations made by MRP Programs to local pest control professional association chapters.

BASMAA believes the most cost-effective way to "urge" pest control operators to promote IPM services to their customers and to become IPM-certified is to work with the Bay Area's own EcoWise Certified Program, which conducted such outreach and whose website now provides a focal point to both recruit new IPM providers and assist customers to find and hire companies and individuals who practice integrated pest management. BASMAA's *Our Water, Our World* website provides a link on its home page (<http://ourwaterourworld.org/Quick-Links/Pest-Control-Operators-and-Landscapers>) to the EcoWise Certified IPM Program.

This year, BASMAA worked with the Bio-Integral Resource Center (BIRC) to conduct a major update of its EcoWise Certified Program online listing of IPM providers – contacting the listed companies and revising the listing to make it clearer which companies are EcoWise Certified (http://www.ecowisecertified.org/ecowise_find.html) ("Service Providers") vs. individuals (http://www.ecowisecertified.org/ecowise_find2.html) ("practitioners") who are EcoWise Certified but whose companies are not. In making that distinction, BASMAA and BIRC strongly encouraged companies to become EcoWise Certified themselves, and structuring the online listings that way provides a constant encouragement to do so.

BASMAA followed up the update with a letter (attached) to the approximately 19 Bay Area companies (of about 30 listed statewide) that were not Certified IPM Service Providers but that had Certified IPM practitioners on staff noting their listing status and encouraging them to apply to become Certified IPM Service Providers.

MORE INFORMATION

When you water your lawn or garden after using pesticides or fertilizer, polluted water can run off into storm drains and on to local creeks, lakes, bays, or the ocean. But—there are plenty of ways to keep pests away that don't pollute, like using the less-toxic products you'll find in this guide!

Our Water Our World is a partnership between home and garden centers and local government agencies working together to reduce water pollution caused by pesticides. Look for **Our Water Our World** look for tags on the literature stand in your local store.

Active ingredients are listed on the front of the product. For a more complete list, go to www.ourwaterourworld.org.

Abamectin
 Ammoniated soaps of fatty acids
 Azadirachtin
 Bacillus subtilis
 Bacillus thuringiensis israelensis
 Borax and boric acid
 Canola oil
 Castor oil
 Citric acid
 Clove oil
 Corn gluten
 Cottonseed oil
 D-Limonene
 Diatomaceous earth
 Eugenol
 Hydramethylnon (ONLY use in containerized bait or gel form)
 Clarified hydrophobic extract of neem oil
 Iron phosphate
 Lemon eucalyptus oil
 Methoprene
 Orthoboric acid
 Paraffinic oil
 Petroleum oil
 Picaridin
 Potassium bicarbonate
 Potassium soap (or salts) of fatty acids
 Pyrethrins
 Rosemary oil
 Sesame oil
 Sodium tetraborate decahydrate
 Soybean oil
 Spinosad
 Thyme oil

CONTROL ANTS IN YOUR HOME WITH THESE ECO-FRIENDLY PRODUCTS	
Baits containing borates	Amdro Kills Ants Ant Killer (liquid ant bait), KM Ant Pro ant bait delivery system, Terro Ant Killer II Liquid Ant Bait Station (pre-filled bait stations)
Containerized baits containing hydramethylnon	Amdro Kills Ants Ant Killing Bait (bait stations), Combat Source Kill 4 Ant Bait Stations (use only in enclosed bait stations)
Desiccating dust containing diatomaceous earth (DE)	Concern Diatomaceous Earth Crawling Insect Killer, Safer Brand Ant and Crawling Insect Killer—Diatomaceous Earth, St. Gabriel Organics Diatomaceous Earth Insect Dust
Applicator for diatomaceous earth (DE)	Pest Pistol
Plant-based insecticides	EcoLogic Ant and Roach Killer, Ecosmart Ant and Roach Killer, Orange Guard
Hose attachment	Bug Blaster
Sticky barrier	Stikem Special pest glue, Tree Tanglefoot Insect Barrier

Argentine ants are frequent invaders in California homes. They are tiny (1/8 inch). They come inside a few at a time at first (the scouts), and then in long lines, following scent trails to a food source.

A QUICK FIX FOR AN ANT EMERGENCY

If you deal with ants when they first come inside, a few simple steps can take care of the problem.

1. Find what ants are after (usually leftover food) and where they are entering the room (usually through a crack in the wall). Mark the spot so you can find it again. If you can't find an entry point, see Step 4.
2. Spray lines of ants with soapy water and wipe up with a sponge, and clean up any food or spills.
3. Next, block entry points temporarily with a smear of petroleum jelly or a piece of tape.
4. If you can't find an entry point, clean up the ants (Step 2). Place a bait station in an out-of-the-way spot on the line the ants have been following. Remember to remove the bait station when the line of ants has disappeared so you don't attract more ants into the house. (See *Tips for Using Ant Baits*.)

While they can be pests, ants are helpful creatures, especially outside. Ants kill and eat many pest insects, help to aerate soil, and recycle animal and vegetable material. This is good news, because it's probably not possible to eliminate ants from their outdoor habitat. The best way to manage an ant invasion is to keep them outside.

KEEP ANTS AWAY

- Store food in the refrigerator, or in containers that seal tightly.
- Keep things clean and dry, and fix leaking faucets and pipes (ants come in to find water as well as food).

Choose eco-friendly products for your home and garden. Look for this symbol before you buy.

Fact sheets – Ants (example front)

Attachments

New Our Water, Our World graphic / display materials (continued)

- Weather-strip doors and windows.
- Put pet dishes in a soapy moat—partially fill a wide, shallow container with soapy water and place pet bowls in the water.
- Use silicone caulk to permanently close holes in walls, cracks along moldings and baseboards, and gaps around pipes and ducts to keep ants outside.
- Use a hand duster, such as Pest Pistol, to apply desiccating dust such as diatomaceous earth (DE) in wall openings and cracks before sealing. DE kills insects by absorbing their outer waxy coating, causing dehydration and death. It has little toxicity to humans or pets but inhaling it can cause respiratory problems, so wear a dust mask and goggles when applying. Be sure to buy food-grade DE, not DE for pool filters.

OUTDOORS

- Follow indoor ant trails back to the spot where ants come in from outside, and place enclosed bait stations there.
- Caulk cracks where ants are entering the house.
- Ants are attracted to the sweet, sticky honeydew made by aphids, whiteflies, and scale insects. Use sticky barriers around the trunk of a tree or bush to keep ants away while you deal with the source of the honeydew. Prune any branches that touch walls, fences, or the ground so ants cannot get around the barrier.

ANTS IN YOUR PLANTS?

If ants are nesting in a potted houseplant, move it outdoors. Water it thoroughly and place the pot in a bucket filled with water that comes an inch below the rim of the pot. Use a stick to make a bridge for ants to get out of the pot and the bucket without getting in the water. The ants will soon begin carrying their white-colored young to safety. When no more ants emerge, drain the pot and return it to the house.

TIPS FOR USING ANT BAITS

Baits use a minimum of insecticide and confine it to a very small area. Ants carry small quantities of bait back to the nest to share, which can reduce the local ant population.

- Use baits with active ingredients borate or hydramethylnon. Bait stations with hydramethylnon should be enclosed.
- Argentine ants change their food preferences frequently. If one bait is not working, try another type. Wait at least a day to see if ants take the bait.
- Do not spray insecticide around the bait; it will repel the ants.
- Baits may take several weeks to kill the ants. At first you may see more ants coming to the bait, but after a few days to a week you should see many fewer ants.
- When ants are gone, remove the bait so you don't attract more ants. Return enclosed bait stations to the original box to save and use again. Put the box inside a plastic bag, seal it with a twist-tie, and store away from children and pets.

WWW.OURWATEROURWORLD.ORG

Common home and garden pesticides are found in stormwater runoff, treated wastewater, and in local waterways, sometimes at levels that can harm sensitive aquatic life. **Our Water Our World** is a joint effort by water pollution prevention agencies, participating retail stores, and pesticide distributors and manufacturers—working together to reduce the risks associated with pesticide use.

Our Water Our World fact sheets and store displays educate residents about less-toxic pest management. For the rest of the series of fact sheets, visit www.OurWaterOurWorld.org. Look for the **Less Toxic • Eco-friendly** tag next to less-toxic products in participating stores and nurseries. See the *Pesticides and Water Pollution* fact sheet for information on active ingredients in common pesticides that may cause water quality problems.

Pest control strategies and methods described in this publication are consistent with integrated pest management (IPM) concepts, and are based on scientific studies and tests in actual home and garden settings. Use suggested products according to label directions and dispose of unwanted or leftover pesticides at a household hazardous waste collection facility or event. For more information on pesticide disposal, visit www.earth911.com. No endorsement of specific brand name products is intended, nor is criticism implied of similar products that are not mentioned.

Save Our Water

We are in a historic drought; 2014 was the driest year on record for many parts of California. Here are a few ways you can help conserve our limited water supply from **Save our Water**. Visit saveourwater.com to learn more.

- **Collect the water you use** while rinsing fruit and vegetables. Use it to water house plants.
- **Use the garbage disposal sparingly**. Instead, compost vegetable food waste and save gallons every time.
- **Install aerators** on the kitchen faucet to reduce flows to less than one gallon per minute.
- **Take five-minute showers** instead of ten-minute showers. Save: 12.5 gallons with a low flow showerhead and 25 gallons with a standard 5 gallon/minute showerhead.
- **Use the washing machine for full loads only** to save water and energy. Install a water-efficient clothes washer. Save: 16 gallons/load.
- **Wash cars and boats with a bucket**, sponge and hose with self-closing nozzle. Save: 8-18 gallons/minute.
- **Turn off the water while washing your hair**. Save: up to 150 gallons/month.
- **Choose a water-efficient irrigation system** such as drip irrigation for your trees, shrubs and flowers. Remember to turn it off when it rains. Save: 15 gallons each time you water.
- **Plant drought-resistant trees and plants**. Save: 30-60 gallons each time you water 1,000 sq. ft.
- **Water early in the morning** or later in the evening when temperatures are cooler. Save: 25 gallons each time you water.

HOME & GARDEN

What we ♥

Green tips from **Shaun Beall**, Vice President and California Market Director

Put a layer of mulch around trees and plants to reduce evaporation and keep the soil cool. Organic mulch also improves the soil and prevents weeds. You'll save 20-30 gallons each time you water 1,000 sq. ft.

Subject: Becoming an EcoWise Certified IPM Service Provider

Dear Pest Management Company:

I am writing to you because one or more of your pest management professionals has received EcoWise certification as a qualified practitioner of integrated pest management (IPM). The Bay Area Stormwater Management Agencies Association (BASMAA) encourages your company to raise its status in the EcoWise Certified Program—to become an EcoWise Certified IPM Service Provider.

BASMAA, a Bay Area-wide non-profit organization comprised of our region's municipal stormwater programs, would like to promote your business, as an EcoWise certified company, to Bay Area customers. We represent 100 agencies, including 85 cities and towns, 8 counties, and 7 special districts, all working together to improve the quality of stormwater flowing to our local creeks, the Delta, San Francisco Bay, and the Pacific Ocean. Pesticide pollution in Bay Area waterways, caused by use of pesticides around homes and businesses in urban and suburban areas is a key problem that agencies must address. The EcoWise Certified Program gives us an opportunity to direct people to certified businesses that customers can count on to provide less toxic pest control services.

As you may know, the Bio-Integral Resource Center (BIRC), which administers the EcoWise Certified Program, has revised the online listing of IPM providers so that the distinction between companies that have received EcoWise certification, and individuals that have received the EcoWise certification is clearer (see attached screen shots of web pages):

- EcoWise Certified Service Providers – companies
(http://www.ecowisecertified.org/ecowise_find.html)
- EcoWise Certified practitioners – individuals
(http://www.ecowisecertified.org/ecowise_find2.html)

We want your company's name to appear on the EcoWise Certified Service Providers list. Our member agencies promote the EcoWise Certified Program locally and through BASMAA's *Our Water, Our World* website (<http://ourwaterourworld.org/Quick-Links/Pest-Control-Operators-and-Landscapers>). We encourage you to visit http://www.ecowisecertified.org/ecowise_cert_summary.html to find out how your company can become EcoWise Certified.

Thank you for your consideration of this opportunity. Please contact me (info@basmaa.org) or BIRC (BIRC@igc.org) with any questions.

Sincerely,

Geoff Brosseau, BASMAA Executive Director

EcoWise Certified IPM Service Providers

EcoWise Certified IPM Service Providers must demonstrate through a rigorous program of testing, service record reviews, and field audits that they are offering Integrated Pest Management (IPM) services that meet EcoWise Certified standards. EcoWise Certified standards are designed to reduce pesticide exposures to people, pets, and environment. The EcoWise Service Providers listed below can manage ants, roaches, flies, spiders, rodents, stinging insects, bed bugs, and many other pests using proven, effective IPM methods.

Note: EcoWise Certification does not cover termites or other wood destroying organisms.

Be sure to mention EcoWise certification and ask for EcoWise Certified IPM services when you call!
